THE TOKEN.

o gleam of baumers on the far-off hi'is; o gittiving crested heatd, riding swift abow through dreamy clouds the golden rift, ad speak to waiting souls a worst that fills be measured each need, to host all tills, of from sad hearts the weary weight to lift, trumpet to prelude the royal gift; sirong, sure Voice, which through the dark thrills.

Yet lo! the token! from the wintry earth Upportinging, u uie and white! A lowly lest To hear the message of the world's new birth, And flash a smile o'er all is furrowed grief? One blosson with its promise from the skinct; "I conquered death; ye too, some day, ahalf rise." Spring, 1886.—X. J. Eccosing Past.

HOUSE, FIELD AND FARM.

tems of Interest to People in the Country. An Illinois correspondent of the Ger nantown Telegraph writes as follows:

ABOUT BEES .- A correspondent of the New York Evening Post, in speaking of bees, says that they are divided, as is well known, into three distinct classes—the queen, the worker and the drone. The

first is hatched in sixteen days, the ser-ond in twenty-one days, and the third in twenty-four days. The workers are the smallest, and perform all the labor. The workers hatched in the autumn should live workers inches in the state of the spring bight or nine months but those in spring or summer seldom survive beyond three months. The working bees collectively or summer seldom survive beyond three months. The working bees collectively regulate the affairs of the hive, there being no head or centre of government. The queen is not a ruler, but merely the mother of the swarm, and her removal causes the greatest consternation in the family.

Mothers: Mothers: Mothers: 1: Mothers 1: Nothers and the presentation of Sardout of the part of the present of the pr

habit for a man to pause before affixing his postage stamp, and to consider whether judiciously and conscientionally he had not better save his money. When once be has dropped his letter into the letter-box, he has committed one of the irrevocable acts of this life. As you prepare to affix your stamp, give one final thought to conscience, whether you might not alter, improve, or altogether obliterate that letter. There may be all sorts of wrong and evil connected with letter-writing; but it specialize an instance, you may have been writing, an angry letter. It may be a clever, caustic letter, and you feel rather inclined to regard it approvingly, considered as a literary production. But it may be unrescenable and untrue. You may be unrescenable and untrue. You may be unrescenable and untrue. You may be unrescenable has defined the seed of the physician's prescription about the cucumber; to peel it carefully, silce it tenderly, be gingerly with your vinegar and plenteous with the oil, sprinkle the popper, brown or red, over it—and then fling the mess out of the window. So when yous it down to your letter, my dear and slightly excited friend, pile up your invectives, accumlate your adjectives, be caustic and cutting in your phrases; but just before you post it give a thought to the ethics of a postage stamp, it has been a standard remedy, at all times red, has a standard remedy, at all times red, and it is a standard remedy, at all times red, and the size of the physical post of the physical post of the physical prescription and the letter-strong and the physical prescription about the cucumber: to peel it carefully, silce it tenderly, be gingerly with your vinegar and plenteous with the oil, sprinkle the popper, brown or red, over it—and then fling the mess out of the window. So when you sit down to your letter, my dear and slightly excited friend, pile up your invectives, accumlate your adjectives, be caustic and cutting in your phrases; but just before you post it give a thought to the ethics of a postage stam fling the mess out of the window. So when you sit down to your letter, my dear and slightly excited friend, pile up your invectives, accumulate your adjectives, be caustic and cutting in your phrases; but just before you post it give a thought to the ethics of a postage stamp, light your pipe with it, and save your money.

The following is a speciman extract from Kearney's recent speech in San Francisco for which he has been sentenced to im-

mantown Telegraph writes as follows:
Hoping to induce some one (would it were many) to provide their family with an abundant supply of one of the finest fruits, a few hints are offered on strawberries. Early spring is the time to set them in this section of country, as ordinarily our fall seasons are to dry for the successful planting of them. Many in this vicinity have planted enough for family use, taken tolerable care of them the first season only, and of course in a year or two more their strawberries had "tun out." It should be impressed upon the buyers of plants by those who supply them, that they need a certain amount of care through each season, as much as any crop of the kitchen garden or farm, for which they pay amply. They require mulching here on the lirst solf ifferexing of the ground in fall or early winter. It is advisable, when loosening up the mulch after severe freezing weather is over in the spring, to leave a slight covering until our usual light frosts about the middle of May are past. Growers of plants for sale might offer shorter lists of highly recommended varieties, greatly to the benefit of their customers. A catalogue of this class before me gives adetailed account of twenty-five varieties, which from the descriptions, a novice would not be willing to dispense with one of them. In my own experience of thirty-five years here in their culture, making it a point to test new varieties of high reputation, a very small part of them prove to be valuable in my grounds. The much-lauded Jacanda has been obtained several times, and is not worth anything in any soil I can give it, when comared with Charles Downing, Green Prolific or Old Necked Pine.

About been and the rest of the season of the New York Ecening Post, in speaking of the stream of the prolific or Old Necked Pine.

About been and the rest of the season of the thest of the season of the thest of the prolific or old Necked Pine.

About been and the rest of the season of the seaso lawless assassins and incendiaries, who Hoping to induce some one (would it are meeting now to decide who shall be

FOR UPWARDS OF THIRTY YEARS Mrs. Winslow's Soothing Syrup has been used for children. It corrects acidity of the stomach, relieves wind coilc, regulates the bowels, cures dysentery and diarnhoo, whether arising from teething or other causes. An old and well-tried remedy, 25 cents a bottle.

What other preparations fail to do, Hall's Hair Renewer surely accomplishes. It renews the hair and especially restores its color when gray and faded. As a dressing it is unsurpassed, making the hair moist, soft and glossy. The most economical preparation ever offered, its effects remain a long time, and those who have once made a trial of it will never use any other.—Advertiser and Union, Frednic, N. Y.

Benewhers Friends, Benewhers.

Fodder crops must be put in early. A mixture of oats and peas is the best crop for early cutting, to come in after the first clover, which follows the rye. The two sown together will yield, on one acre, about as much as if sown separately on two acres. This may be doubted, but it is true. Tall growing leafy oats, and tall peas, yield the most fodder; the "Blackeye Marrowfat" pea, grown in Canada as a field crop, is the best for our use, the seed being free from weevil. For a second crop, the earliest small "Canada Gray" pea may be sown. The fodder is in the best condition for cutting when the peas are in full blossom.

CLOVER AND GRASS SEED.—Clover may be

Sown this month. When the ground is lifted and cracked by a light frost, the seed may be sown with good effect. But the preferable method is to sow as soon as the soil is dry enough, and then run over the ground with a light smoothing harrow, and spread 150 pounds of fertilizer immediately. Orchard grass is a most valuable kind to sow with clover; it is early and late, and is unsurpassed for cutting, for soiling or for hay. Three bushels of seed per acre is not too much, as close seeding is needed, to prevent the grass from forming large clumps or tools.—American Agriculturies.

Five Hondred Thousand Strong. In the past few months there has been more than 500,000 bottles of Shiloh's Cure sold. Out of the vast number of people who have used it, more than 200,000 cases of Consumption have been cured. All coughs, croup, asthma and brouchits, yield at once, hence it is that everybody speaks in its praise. To those who have not used it, let us say, if you have a cough, or your child the croup, and you value life don't fail to try it. For lame back, side or chest, use Shiloh's Porous Plaster.

Sold by E. Bocking, Agent, Odd Fellow's Hall, and Chas. Moenkemoeller, corner Main and Twenty-second streets. amo arrong and in active demand. Chicage Burlington and Quincy fell from 145 to 146% and recovered to 145%. The rise in New Yor Central was based on a report that the annua dividend was to be increased from 8 to 10 pe cent. The general market closed buoyant, Transactions 250,000 shares.

A Strange People.

Do you know that there are strange people in our community, we say strange because they seem to pre(er to suffer and pass their days miserably, made so by dyspepsia, and liver complaint, indigestion, constipation and general debility, when Shiloh's Vitalizer is guaranteed to cure them.

Sold by E. Bocking, Agent, Odd Fellow's Hall, and Ches. Meenkemoeller, corner Main and Twenty-second streets.

catarrh, diphtheria, canker mouth, and head, ache, in Shiloh's Catarrh Remedy. A massi neteror free with each bottle. Use it if you desire health and sweet breath. Price 50 cents. Sold by E. Bocking, Agent, Odd Fellow's Hall, and Chas. Moenkemoeller, corner Main and Twenty-second streets. Isaac Watts was a Little Man. He said jocosely to six of his tall quizzing friends who asked how he felt among so many men, "that he was a sixpence among six pennies, worth them all." Sozodont is just so; there may be many preparations for the teeth, but it is worth them all."

TEMPERANCE is attracting much attention, showing itself in local option laws, societies, crusades and restrictions upon liquor production; but with all these efforts, the consumption is enormous, and, undoubtedly, the reason is, because there is nothing atrenuously advocated to relieve and destroy the craving for stimulants. But, if the disease was treated rationally, by arousing the torpid Liver with Simmons' Liver Regulator, the dispirited drunkard would find his cravings soon dissipated, and with cleared head and active Liver, he would not want liquor.
